Amendment of the claims under Article 19(1)

1. (Amended) A deodorizing filter comprising a first deodorizing filter regulated so as to have a high-pH environment and a second deodorizing filter regulated so as to have a low-pH environment,

wherein the first deodorizing filter and/or the second deodorizing filter are filters of a cobalt phthalocyanine complex and an iron phthalocyanine complex supported on an active-carbon-filled paper.

2. (Amended) A deodorizing filter comprising a first deodorizing filter regulated so as to have a high-pH environment and a second deodorizing filter regulated so as to have a low-pH environment,

wherein the first deodorizing filter is a filter of a cobalt phthalocyanine complex and an iron phthalocyanine complex supported on an active-carbon-filled paper.

3. (Amended) A deodorizing filter comprising a first deodorizing filter regulated so as to have a high-pH environment and a second deodorizing filter regulated so as to have a low-pH environment,

wherein the first deodorizing filter and the second deodorizing filter are filters of a cobalt phthalocyanine complex

and an iron phthalocyanine complex supported on an active-carbon-filled paper.

4. (Amended) The deodorizing filter as recited in any one of claims 1 to 3, wherein the weight ratio of the complexes supported, cobalt phthalocyanine complex/iron phthalocyanine complex, is 98/2 to 55/45.

5. (Amended) The deodorizing filter as recited in any one of claims 1 to 3, wherein the weight ratio of the complexes supported, cobalt phthalocyanine complex/iron phthalocyanine complex, is 95/5 to 85/15.

6. (Amended) The deodorizing filter as recited in any one of claims 1 to 5, wherein the pH of the high-pH environment is 7.5 to 12.0 and the pH of the low pH environment is 1.5 to 5.0.

7. (Amended) The deodorizing filter as recited in any one of claims 1 to 6, wherein the amount of the complexes supported is in the range of 200 to 20,000 μg with respect to 1 g of the active-carbon-filled paper.

8. (Amended) The deodorizing filter as recited in any one of claims 1 to 7, wherein the active-carbon-filled paper contains active-carbon at a content of 40 to 80 mass %.
